

INSTRUCTIONS TO RUN SHINY APP

Step1:

Load the ui.R file from the zip file into R studio.

Step 2:

Click on the RunApp icon with external mode on to host the Application in the local host.

Step3:

On the UI interface, first enter the genres for the movie to be displayed. You cannot select a movie without selecting a genre.

Step 4:

After entering the genre, select movies which interest you under each genre.

The Search Engine lists top 10 movies which you may also like.
